CRISP DAVE Tool Informational Webinar

October 27, 2026

Agenda

1. Policies for eCQM Reporting
2. OAPC Exemption Application
3. Registration Form Overview
4. Registration Form Demonstration
5. Q&A

eCQM Reporting Policy Updates

- We've adjusted PY 2026 eCQM reporting requirements for the DAVE Tool
- **Participating organization** = Tax ID, or TIN
- Today we'll cover:
  - **Recap:** File submission options
  - **Recap:** CMS 2, Screening for Depression and Follow-Up Plan
  - **Update:** Which providers to include
  - **Update:** Minimum patient threshold
  - **Update:** Exemption Request Application

Recap: QRDA-I Is the Standard File

- For PY 2026, the DAVE Tool will accept **QRDA-I files**
- Participating organizations with an **approved exemption** report **aggregate data instead**
  - Numerator, denominator, and exclusion values for each measure

Recap: CMS 2 Is Aggregate for Everyone

- All participating organizations report **CMS 2: Screening for Depression and Follow-Up Plan** as **aggregate data**, entered manually
- **No exemption request is needed** for this measure
- Submitting CMS 2 in a QRDA-I file **remains an option** if you prefer

Update: Include Primary Care Providers Only

- PY 2026 eCQM data should include primary care providers only, based on each program's roster:
  - **MDPCP AHEAD:** practitioner roster in the CMS Enterprise Portal
  - **PC AHEAD:** practitioner roster in the CMS 4i Portal
  - **Medicaid Advanced Primary Care Program:** Q4 MCO Assignment List in MPR
- **Exclude specialty providers**, even if they have assigned members
- Can't remove specialists from your file? The **DAVE Tool can exclude them** from the measure calculation

Update: Minimum Threshold of 20 Patients

- eCQM data are evaluated at a **participating organization level**
- A participating organization are required to submit all measure when its **all-payer denominator exceeds 20 patients**, counted across all of its practices
- Once a participating organization is over the threshold, data for all practices should be submitted, regardless of the number of patients seen

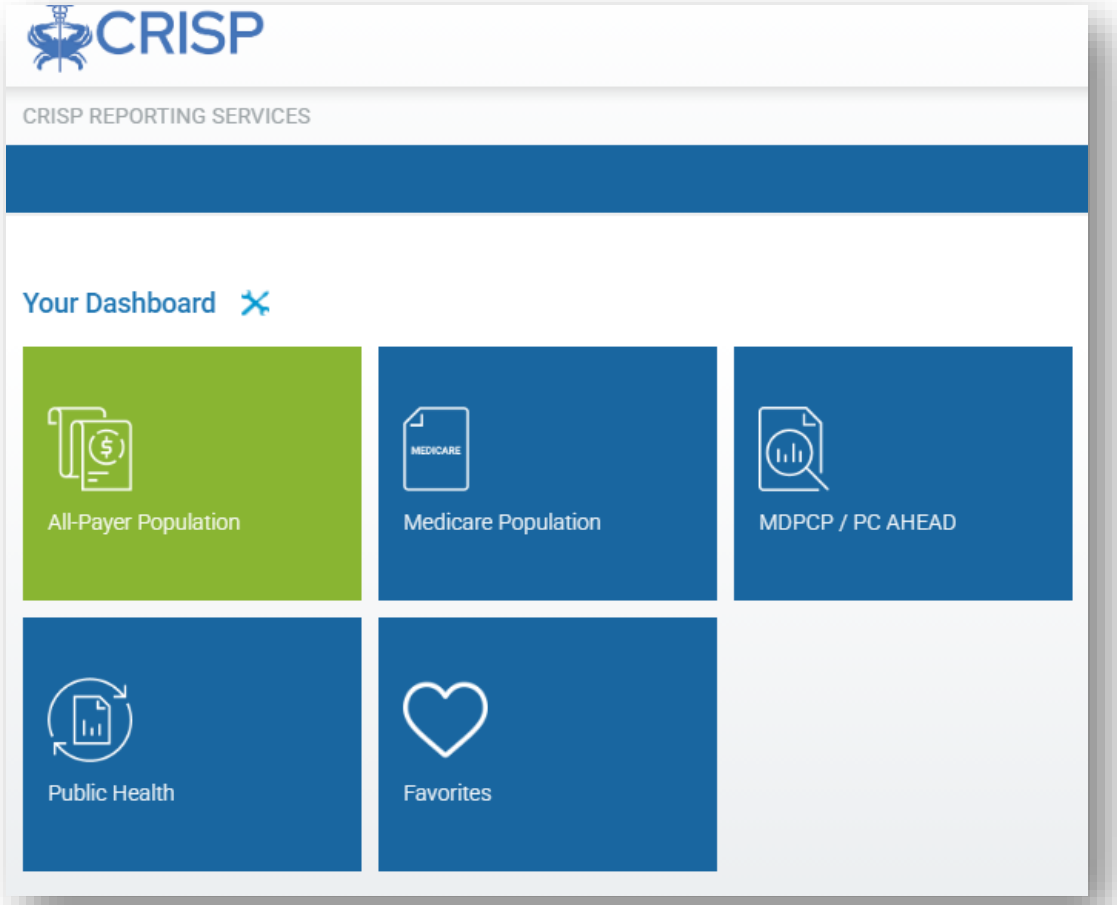

Update: Exemption Request Application

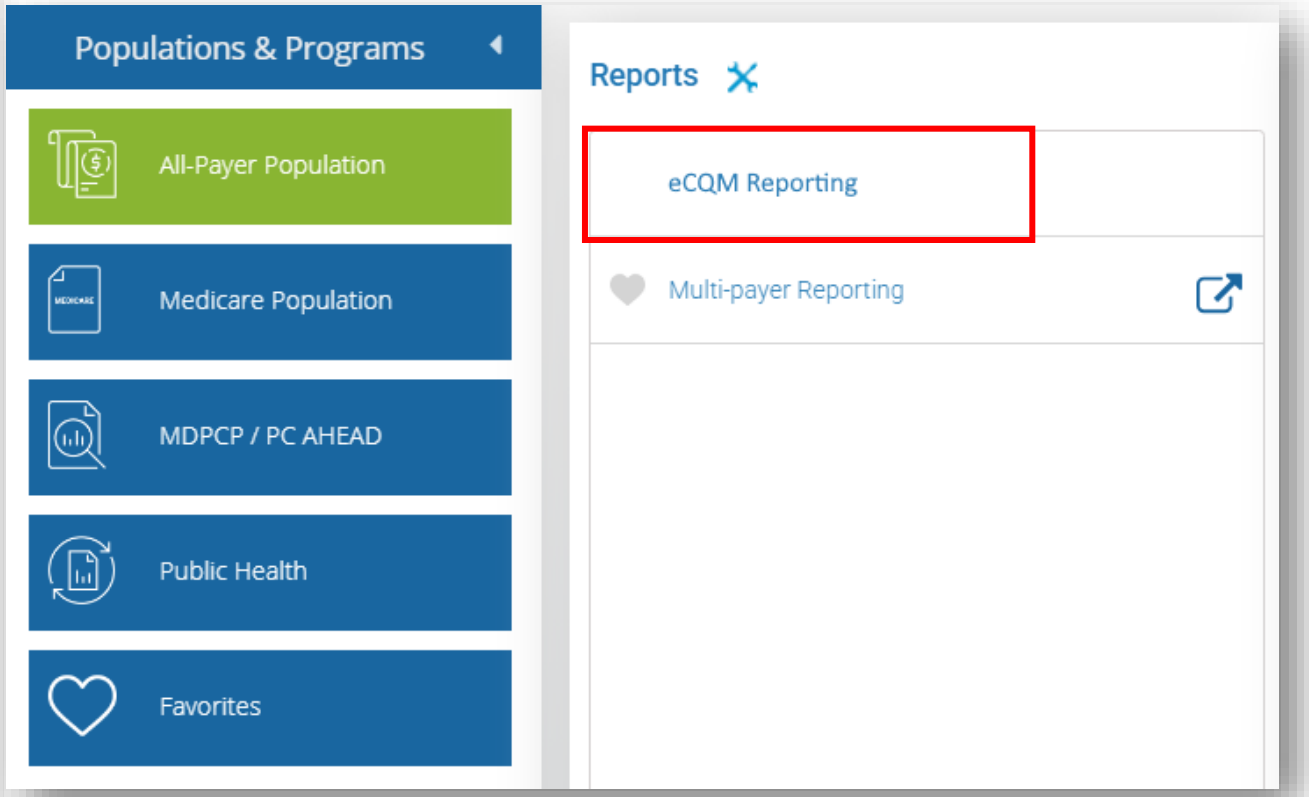

- Participating organizations that cannot provide QRDA-I complete the Exemption Request Application
- The application asks about:
  - Your organization and the practices requesting the exemption
  - Staffing support for data
  - Your technical barriers to pulling QRDA-I files
- **Approved**: submit aggregate data manually
- **No application**: submit QRDA-I files for PY2026 eCQMs
- **Opens early next week** in Cognito

Registration Form Introduction

- Each TIN (or MDPCP participating Practice not also participating in Medicaid Advanced Primary Care) will:
  - ***Identify*** the TIN/Practice's patient population and submission methods for all relevant measures
  - ***Validate*** all affiliated practices and provide missing details, such as Type 2 NPIs and addresses
  - ***Validate*** participating primary care providers within each practice using NPI
- The Reports POC for each TIN (& MDPCP-Only Practice) is required to submit one registration form on behalf of their entire TIN/Practice
  - The POC can gather information offline or provision additional users to input registration details
- The Registration form will open on 11/2

Accessing the Registration Form

Registration Form Checklist

Registration is complete once your TIN/MDPCP-Only Practice has:

- ✓ Identified the patient populations served
- ✓ Confirmed measure submission methods
- ✓ Verified that all practices with participating providers are represented
- ✓ Verified that all participating primary care providers are represented with their complete practice affiliation(s)
- ✓ Submitted **one complete registration** for the entire TIN or MDPCP-Only Practice

Resources

- Be on the lookout for communications from CRISP and OAPC on upcoming office hours, webinars, and training opportunities
- We will follow up after the webinar with:
  - a recording of today's webinar
  - a copy of today's slides
  - the DAVE tool flyer
- You can also find these resources on our website at crisphealth.org/AHEAD
- Have questions? Contact CRISP at mdpcp@crisphealth.org or OAPC at mdh.pcmodel@maryland.gov

Appendix B:
TIN-level Minimum Thresholds Example

- Minimum thresholds are evaluated across all practices and all payers within a TIN

	Controlling Blood Pressure		
	All-Payer Numerator	All-Payer Denominator	All-Payer Rate
Practice 1: Family Medicine	1,526	2,078	73%
Practice 2: Family Medicine	616	752	82%
Practice 3: Pediatrics	4	7	57%
Total TIN	**2,146**	**2,837**	**76%**

TIN-Level Measure Performance
