

CRISP HIE Services for Ambulatory Practices

Connect. Share. Improve Patient Care

CRISP is a regional health information exchange (HIE) serving Maryland, the District of Columbia, and West Virginia. We also exchange data regionally with provider organizations in Delaware and Northern Virginia. We are a not-for-profit organization advised by a wide range of stakeholders who are responsible for healthcare throughout the region. CRISP has been formally designated as Maryland's statewide health information exchange by the Maryland Health Care Commission.

Clinical Query Portal

The CRISP clinical query portal is a free, web based tool to access your patient's clinical data through the HIE.

- CRISP receives clinical and encounter data from over 100 hospitals in MD, DC, WV, VA and DE, including all 55 acute care and critical access hospitals in Maryland and DC.
- Physicians, licensed health providers, care coordinators, and support staff can have access to query patients they are treating, or have a care coordination relationship with and view clinical data.
- Access patient demographics, lab results, radiology reports, Maryland Prescription Drug Monitoring (PDMP), discharge summaries, history and physicals, operative notes, and consults.
- For a full list of organizations participating with CRISP, visit www.crisphealth.org.

Encounter Notification Service (ENS)

ENS allows primary care physicians, care coordinators, and others responsible for patient care to receive real-time alerts when their patients are seen in the ED or admitted or discharged from the hospital, long-term care facility or other participating provider organizations. These alerts will help your practice coordinate your patients' care and schedule any necessary follow-up treatments or visits. More than 700 ambulatory practices and practice consortia receive notifications from more than 100 acute care and critical care hospitals and over 90 long-term care facilities in the region.

Prescription Drug Monitoring Program (PDMP)

The Maryland Prescription Drug Monitoring Program gives you access to prescription information for all Schedule II-V drugs filled in Maryland and Virginia.

- Available inside Clinical Query Portal or through our new standalone PDMP portal.
- Prescribers, Dispensers, & other Licensed Staff may have access.
- View interstate PDMP data for neighboring states.

CRISP
Connecting Providers with Technology
to Improve Patient Care Across the Region

Connect To CRISP

Ambulatory Integration

Tier 1: View Clinical Data & Receive Hospitalization Alerts

Initial connectivity to CRISP will allow you access to our core services.

CRISP Services

- Encounter Notification Service (ENS)
- Clinical Query Portal
- Prescription Drug Monitoring Program (PDMP)

Benefits

- Notifications when your patient has a hospital encounter
- Access to clinical records
- View all schedule II-V prescriptions that have been filled by your patients
- Reduce administrative overhead
- Meet requirements for Medicare & Payor Reimbursements

Tier 2: Send Encounter Information About Your Patients

Contribute to a more comprehensive patient profiles and improve data sharing among providers treating the same patients.

CRISP Services

- Autosubscribed Patient Lists for ENS

Benefits

- Improve care coordination & information flow
- Help build comprehensive patient profiles
- Eliminates the need for your practice to send CRISP repeated manual updates to your patient panel

Tier 3: Send Clinical Information About Your Patients

Sending clinical data to CRISP will serve to further contribute to comprehensive patient profiles. This will increase and enhance the data available among providers treating the same patients.

CRISP Services

- CAIiPHR: Clinical Quality Measures (COM) Reporting Tool
- Enhanced Analytic Reporting

Benefits

- Automate COM Reporting
- Improve Your Quality Measures Performance
- Prepare for future reimbursement and risk-sharing payment models
- Reduce Repeat Testing & Treatment
- Easily communicate treatment provided at your practice to other providers
