

MDPCP Alignment with State Population Health Strategy: CRISP Tools and Supports

2023 CRISP Summit

MDPCP Management Office

June 6th, 2023

Agenda

- Introductions
- Overall message & MDPCP alignment with SIHIS
- Health Equity Tools
 - Maryland Health Equity & Digital Quality Measures Project
 - Maryland 211 and CRISP Referrals
- Population Health Tools
 - Prediabetes and Diabetes Tools
 - Opioid Use Disorder Tools
- Q&A

Introductions

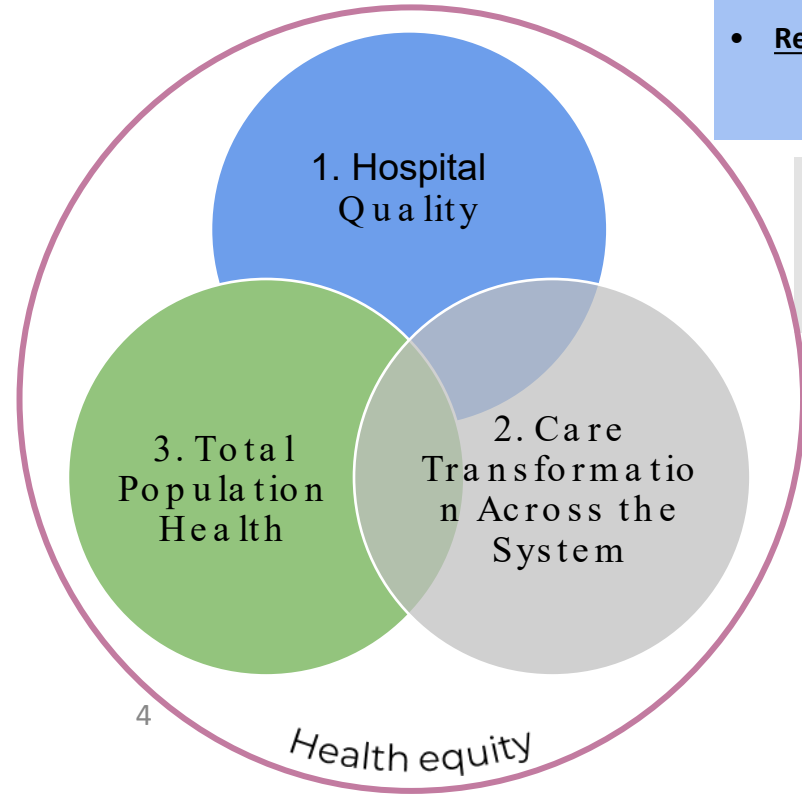

Emily Gruber
MDPCP Health Equity
Program Manager

Candice Morrison
MDPCP Health IT
Program Manager

MDPCP Aligned with State's Population Health Strategy (SIHIS)

Hospital Quality

- **Reduce avoidable admissions**
 - MDPCP focuses on reducing PQIs by building care management infrastructure and providing CRISP/Hilltop data reports

Care Transformation Goals

- **Improve care coordination for patients with chronic conditions**
 - MDPCP requires 1) timely follow up for Inpatient admissions and ED visits; 2) longitudinal care management

Total Population Health Goals

- **Priority Area 1 (Diabetes): Reduce mean A1C/BMI**
 - Diabetes A1C quality measures
 - BMI and follow up plan quality measure
- **Priority Area 2 (Opioids): Improve overdose mortality**
 - Implement SBIRT iDashboard
 - Next Steps: Planning for MOUD treatment implementations

Maryland Health Equity & Digital Quality Measures Project

eCQM Data Management Solution

Frequent data updates and access

Enhanced visibility into quality performance

Health equity focus

Reduced reporting burden

Maryland Health Equity & Digital Quality Measures Project: 2 Technical Solutions

Option 1: EHR Data Direct Extract

- Direct extract of data from EHR database
- Best for EHRs: Epic, Cerner, Meditech, Allscripts

Option 2: QRDA I File Upload

- Upload of QRDA I file data to Medisolv Submission Portal
- Best for cloud-hosted EHRs

Maryland 211 & CRISP Partnerships: Data for SDOH Referrals

- **211-CRISP Integration:** Integrating 211 resource directory data into CRISP - *part of a long-term effort to build bi-directional SDOH referral tool capacity in CRISP*
- **Enhancing 211 Data Quality:** Building new filtering functionality for eligibility and target population in 211 resource database
- **Improving Feedback Loops:** Improving process for search users and community-based organizations to provide feedback on database records
- **Service Registers:** Implementing service registers in focused counties to partner with local agencies to ensure validity and comprehensiveness of database records

Maryland 211 & CRISP Partnerships: SDOH Referrals

How will this work benefit primary care practices?

Improve clinical-community
information sharing and cross-
sector relationships

Improve feedback loops for
community resource directory

Prediabetes and Diabetes Tools

Diabetes Prevention

*Prediabetes: ENS Prompt
Prediabetes Smart Alert Filter
and MFT File*

- Tool to alert practices on Prediabetic patients for Education, Quality Improvement, and Referrals to DPP.

Diabetes Management

*Diabetes: eCQM Data
Management Solution*

- Tool to increase performance on Diabetes A1C and BMI quality measures.

Opioid Use Disorder Tools

2023 Release: Non-Fatal Overdose Smart Alert Filter in ENS Prompt- for Opioid Management

The Smart Alert identifies patients in your practice that have had a non-fatal overdose and were treated by Emergency Medical Services (EMS) or treated at a hospital emergency department. This allows you to focus on your Non-Fatal overdose cohort patient population.

2023 Release: High-Risk Medications - Top 100 Prescribers Report for Opioid Prevention and Management

This report assists MDPCP practices in investigating prescriber and older adult MDPCP patients with high volumes of High Risk Medications.

Upcoming Release: MDPCP SBIRT Dashboard for Opioid Prevention

1. **Screening:** To determine if a patient is at risk for or may have an alcohol or substance use disorder.
2. **Brief intervention:** Focus on increasing insight and awareness regarding substance use. A motivational conversation to help the patient consider behavioral change.
3. **Referral to Treatment:** Provide extensive treatment with access to specialty care

Thank you!
