Here are some Best Practices, and Practices to Avoid, to help you complete your patient panel template more effectively:

Best Practices:

- Ensure ALL column headers are included, named, and listed IDENTICALLY to the order on the patient panel template. We recommend copying & pasting your patient data into the template, so that the headers are already correct.
- Ensure your patient panel is named correctly. The file should be named in this format: subscribercode-1-z-MM-DD-YYYY. (Ex: ENS_VAL-1-z-02-14-2023).

- Ensure your patient panel is saved as a .csv file. (.csv, comma delimited).
- Ensure your patient panel reflects accurate data in ALL required fields. (Patient ID, First Name, Last Name, Address, City, State, Zip, DOB, & Gender).
- Ensure that there is no unnecessary or additional spacing within the cells.
- Ensure there are no duplicate patients.

Practices to Avoid:

- Do not leave blank cells in the required blue highlighted fields.
- Do not add additional details (e.g., lives with wife, shelter, or likes to watch basketball) in Address 1 or Address 2 fields.
- Do not add additional characters in the fields. This includes *, /, (), etc. in required fields.
