

## EQIP ENTITY FORMATION

### WHAT IS AN EQIP ENTITY?

An EQIP Entity is an individual Care Partner or a group of Care Partners\* that enroll and participate in EQIP together.

\*Care Partner: general practitioners, specialists, or other CMS-approved practitioners who participate in EQIP.

### WHO CAN I INCLUDE IN MY EQIP ENTITY?

All Care Partners must first meet the participation requirements for EQIP. There are no specific requirements as to how EQIP Entities should be organized or managed.

EQIP Entities may consist of:

- Practitioners from a single practice location;
- Practitioners from an entire hospital or organization;
- Practitioners from a specific specialty within an organization or;
- Practitioners from multiple organizations.

#### Important considerations when setting up EQIP Entities:

- The EQIP Entity will select specific Clinical Episode Categories and EQIP Interventions.
- Performance in EQIP will be assessed at the EQIP Entity level.
- Any earned incentive payments will be due to the EQIP Entity.

Please reach out to [equip@crisphealth.org](mailto:equip@crisphealth.org) for assistance with EQIP Entity Formation.
