

EQIP INTERVENTIONS

In addition to selecting EQIP episodes during the enrollment period, each EQIP Entity will need to indicate how they intend to produce savings in their selected episodes. EQIP Entities will select at least one of the intervention categories per episode:

| Intervention Category | Example Intervention |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Clinical Care Redesign and Quality Improvement | Standardized, evidence-based protocols are implemented, for example for discharge planning and follow-up care. |
| | Performance of medication reconciliation. |
| | Elimination of duplicative, potentially avoidable complications or low value services |
| Beneficiary/Caregiver Engagement | Patient education/shared decision making is provided pre-admission and addresses post-discharge options. |
| | Implementation of "health literacy" practices for patient/family education |
| Care Coordination and Care Transitions | Assignment of a care manager and enhanced coordination to follow patient across care settings |
| | Interdisciplinary team meetings address patients' needs and progress. |
| | Selection of most cost efficient, high-quality settings of care |

When EQIP Care Partners sign a Care Partner Agreement (CPA) prior to the start of the Performance Year, they indicate they will comply with the intervention(s) they select.
