MEDICATION RECONCILIATON

WHAT IS IT?

This quality measure evaluates the percentage of visits for patients aged 18+ where clinicians document a complete medication list.

Includes prescriptions, over-the-counter drugs, herbals, vitamins, and dietary supplements with the name, dosage, frequency, and route of administration.

WHY DOES EQIP USE IT?

- Accurate medication lists are critical for reducing adverse drug events (ADEs) and promoting patient safety.
- Minimizes risks of medication errors, especially for older adults and those with chronic conditions.

HOW ARE YOU SCORED?

Denominator: All visits for patients aged 18+ with eligible encounter codes (e.g., CPT, HCPCS).

Numerator: Documented, updated, or reviewed medication list at the time of the encounter.
•Includes medications reported by patients, caregivers, or other sources.

WHAT ARE THE SUBMISSION CODES?

- **G8427**: Medication list documented, updated, or reviewed (Performance Met).

- **G8430**: Patient not eligible (e.g., emergent situation) (Denominator Exception).

- **G8428**: Medication list not documented, reason not given (Performance Not Met).
