PACES Episode Definition Summaries

Version 5

Updated: July 2025

DISCLAIMER: These episode summaries are provided to illustrate episode construction and help EQIP participants understand what is included in episode costs. Direct recreation of episodes will not be possible from these summaries. The codes included in each episode are independently developed and verified by the PACES Center

XIV. Orthopedics

a) Aseptic Necrosis
b) Bone nos Fx
c) Carpal Tunnel Surgery
d) Cervical Decompression
e) Cervical Fusion
f) Fracture/dislocation (arm/wrist hand) treatment
g) Fracture/dislocation of knee; treatment
h) Fracture/dislocation (lower leg/ankle/foot) treatment
i) Hip Replacement & Hip Revision
j) Hip/Pelvic Fracture
k) Joint Nos Ganglion/Cyst
l) Knee Arthroscopy
m) Knee Joint Internal Derangement (acute)
n) Knee Joint Internal Derangement
o) Knee Replacement & Knee Revision
p) Low Back Pain
q) Lumbar Decompression
r) Lumbar Fusion
s) Lumbar and Sacral Spine Surgery
t) Osteoarthritis
u) Osteoporosis
v) Shoulder Arthroscopy/Rotator Cuff Repair
w) Shoulder total arthroplasty

XV. Pulmonary/Critical Care

a) Acute Uri Simple
b) COPD
c) Deep Vain Throm/Pulm Embolism
d) Pneumonia
e) Sepsis

XVI. Rheumatology

a) Rheumatoid Arthritis

XVII. Urology

a) Gu device/catheter complications
b) Prostatectomy
c) TURP
d) UTI

Terms and Definitions

Condition Episodes	Condition episodes are of two types, Chronic and Acute • **Acute Condition** – one which comes on suddenly. They are often severe. Acute conditions usually last for a short duration, during which the patient may improve/fully recover • **Chronic Condition*** - a health problem that typically cannot be cured.
Procedure Episodes	Procedure episodes are things such as surgeries and diagnostic procedures. Procedure episodes include, in their definition, indications for the procedure, which explain the reason the procedure was provided, and which may be associated with variation in the cost of a procedure episode.
Associations	Describe episodes that are "paired" due to clinical relevance. There can be many to one and one to many associations. Conditions can be associated with one another; procedures can be associated with one another; and conditions can be associated with procedures.
Combinations	Combinations of episodes take place during the triggering process, prior to assigning services, and result in a single combined episode
Sequelae	Conditions or downstream impacts/results of a disease, procedure or injury that occur during an episode that can be included or excluded from analysis of the cost of an episode.

Please note, the full Excel workbooks for the PACES episodes are linked in the Enrollment group title slide

****Most chronic episodes use a 30-day lookback when a condition is newly triggered during the year. However, a 13-month lookback may apply for chronic conditions identified before the period start, with the episode starting on January 1 of the performance year. (Please see slide 7 [Chronic Episode: Lookback Window Clarification] for more information.***

Episode Components Key

Trigger Codes	ICD-10 codes, CPT or HCPS codes that initiate an episode. These codes indicate that a patient has a particular condition or underwent a particular episode. 1. ICD-10 codes are for episodes related to a condition. 2. CPT or HCPS codes apply to Procedure episodes.
Relevant Diagnosis Codes	A list of diagnosis codes that are relevant to a condition or procedure episode, but are not classified as Trigger codes
Relevant Procedures	Procedures that are deemed relevant and linked to the episode, providing additional information and context on the episode.
Procedure Indications	Codes used to identify the underlying clinical condition or reason for which a procedure was performed.
Episode Categories	Subgroupings of an episode that are clinically and/or financially distinct from other subgroupings

Please note, the full Excel workbooks for the PACES episodes are linked in the Enrollment group title slide

Chronic Episodes: Lookback Window Clarification

- EQIP uses a 13-month lookback before each performance or baseline period to identify chronic conditions for episode initiation.
  - If a chronic condition is found during that lookback, the episode starts on Day 1 of the performance period and runs through the end of the year (or until patient death).
  - If a chronic condition first appears during the performance period, the episode starts on the trigger date with a 30-day lookback and runs through the end of the year (or until patient death).
- Why this matters:
  - The 13-month lookback ensures consistent capture of chronic conditions and aligns with PACES and EQIP operational schedules.
  - The 30-day lookback applies only to new condition triggers within the period.

Cardiology/Vascular

Acute Myocardial Infarction *

PACES Episodes:

- Acute Myocardial Infarction
- ACS other than AMI

To avoid double counting episodes that fall under multiple enrollment groups, we have implemented a flag to ensure each episode is only counted once, under a single enrollment group.
Ex: *All 'CABG with Open Heart Valve Surgery' episodes that are child episodes of AMI will be exclusively considered under the AMI Enrollment group.*

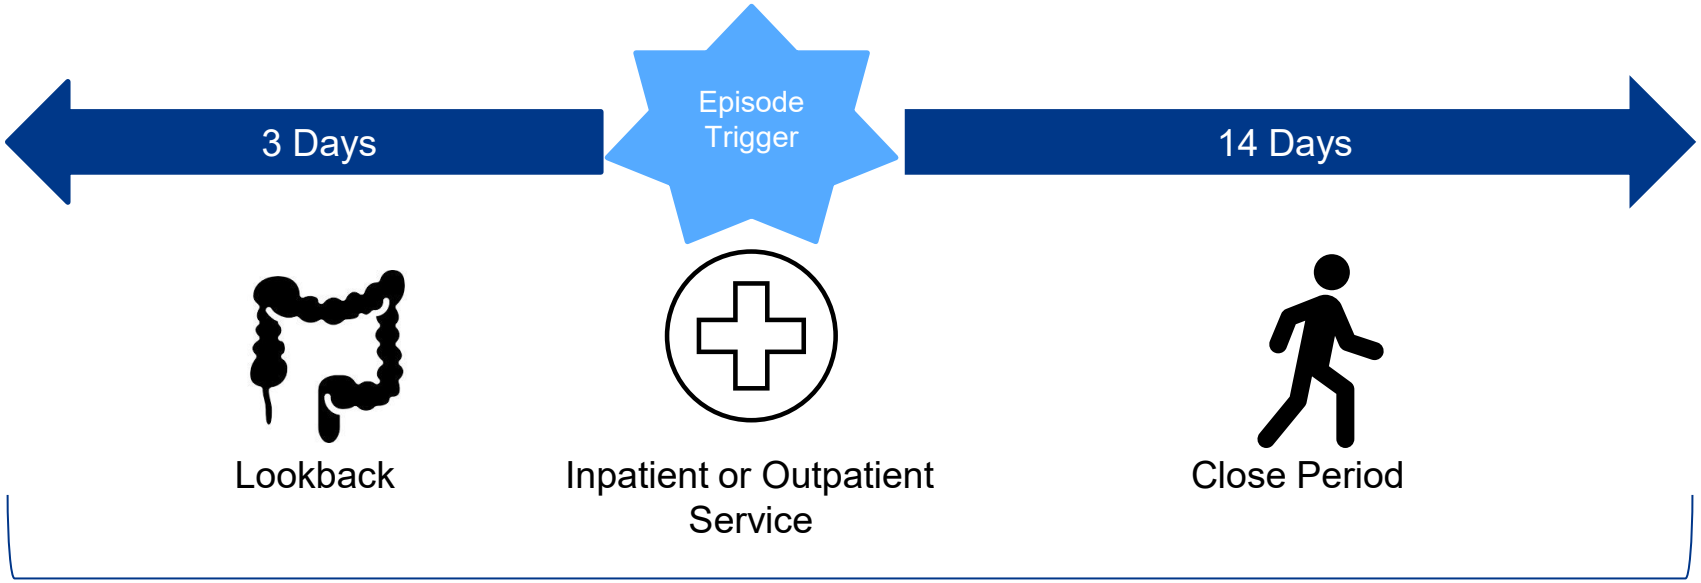
Colonoscopy

PACES Episodes:

- Colonoscopy
    - with EGD Endoscopy
- Sigmoidoscopy

A significant portion of EGD Endoscopy episodes are classified under the combination episode '**Colonoscopy with EGD Endoscopy'**. This combination episode is only categorized under the Colonoscopy group because the Colonoscopy episode is primary in the combination, preventing double counting of episodes.

Episode Length – Colonoscopy



Total Episode Cost = All expected services and complication costs associated from episode trigger until the end of the close period.

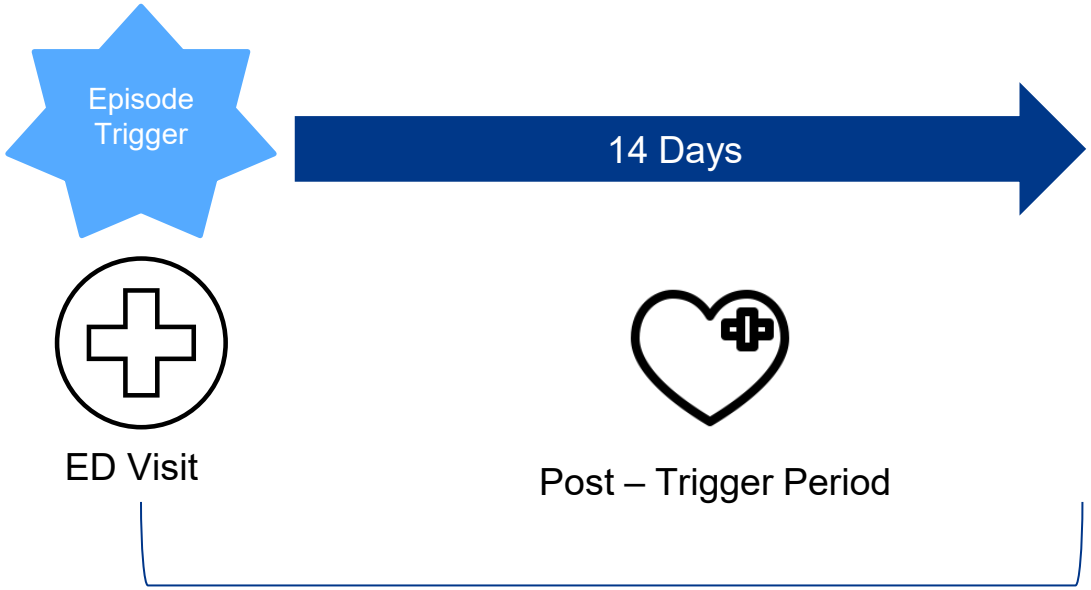
Non-PACES Episodes

Emergency Department (ED)

Emergency Department Episodes are non-PACES episodes triggered by an ED visit with one of the triggering diagnosis. The episode window for an emergency department episode is equal to the length of the ED stay with a zero day look back and a 14-day look forward period. It includes payments associated with all claims incurred during the post trigger window.

Episode Length – ED Episodes – Non-PACES



Total Episode Cost = All costs associated from index service until the end of the post-trigger window.

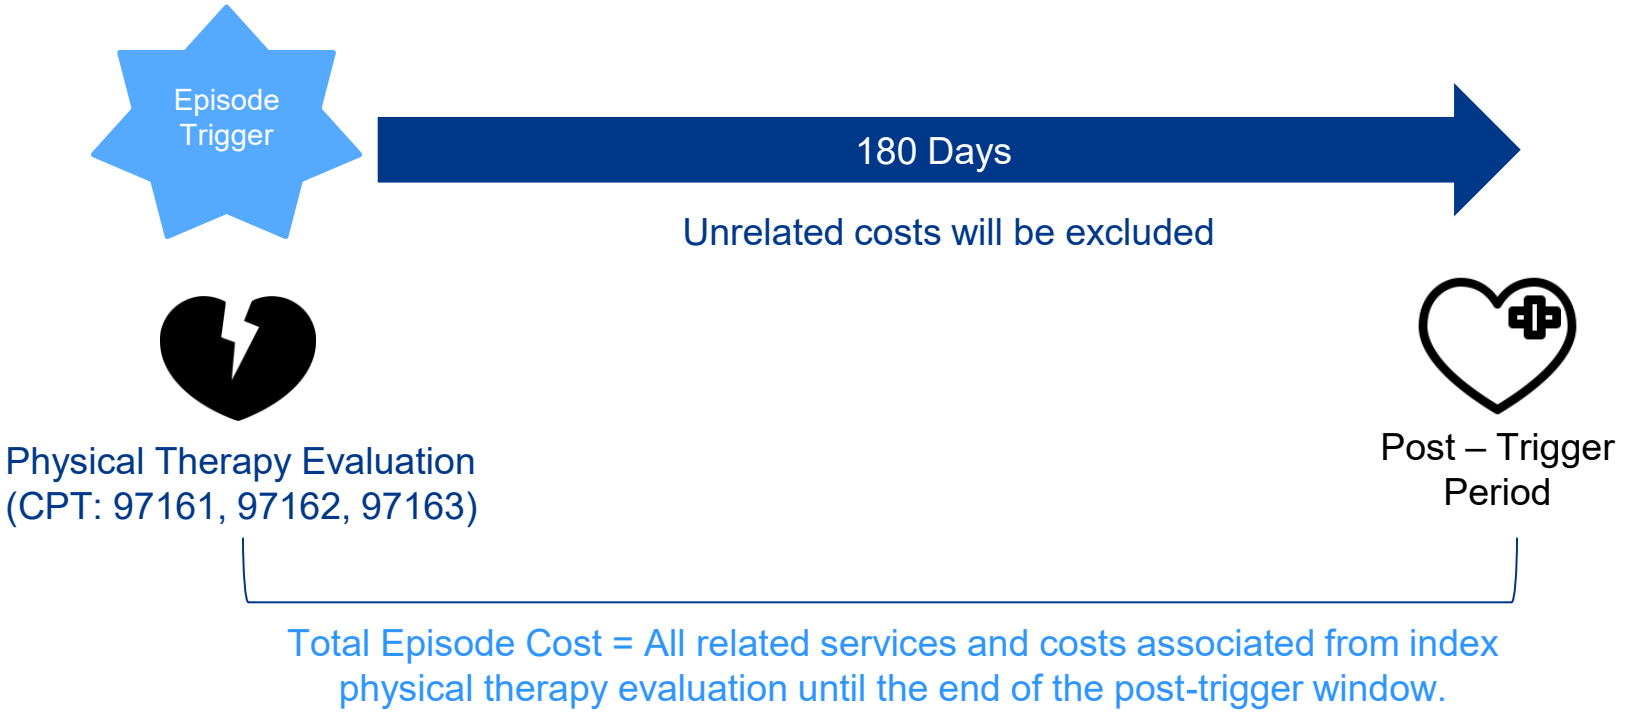
Musculoskeletal (MSK)

Musculoskeletal is a non-PACES episode triggered by an PT evaluation visit with one of the triggering diagnosis in the primary or secondary position. The episode window for a Musculoskeletal episode is 180 days with a zero day look back. It includes payments associated with all claims incurred during the post trigger window.

Musculoskeletal (MSK) – Non-PACES Episode



Note: Beneficiaries with a MSK surgery within prior 6 months of trigger are excluded from episode
