Taylor Pitts - Meals on Wheels

1:30 PM

Patty Brown Innovation Award & CEO's Closing Thoughts

Craig Behm - President & CEO, CRISP Shared Services

Session Details

Welcome

Welcoming remarks from Megan Priolo, DrPH, MHS – VP & Executive Director, CRISP MD

A Regional Approach to Optimizing Rural Health Through Telehealth & Technology

Christian Milaster, MS – Founder & CEO, Ingenium: Group Learn what it actually takes to build integrated, sustainable telehealth models in rural settings — and how to position your organization for upcoming funding opportunities.

From Paper to Partnership: Modernizing Maternal Care Coordination in MD

Ben Wormser, MD, MPH & Andrea Augustine – MD Department of Health: Hear how the Integrated Maternal Health Project moved from paper-based workflows to real-time care coordination — and how your facility can get involved as it expands statewide.

A Health Plan's Push to Close the Telehealth Data Gap

Angela Hart – Maryland Physicians Care/MCMI; Mary Pohl – CRISP: Find out how Maryland Physicians Care connected their telehealth vendor directly to CRISP, turning siloed encounter data into a shared resource for care teams.

More Signal, Less Search: What's New in InContext & Population Explorer

Jeffrey Bahen – CRISP Shared Services: Get a walkthrough of the latest enhancements, including a new My Patient Summary dashboard, longitudinal lab timeline view, and preventive services alerts in Population Explorer.

First Look: CRISP's New Clinical Reporting Dashboards

Kate Talbert & Francesca Charles – CRISP Shared Services: See a live demo of CRISP's new population health dashboards — powered by HIE clinical data, not just claims — including a preview of the Diabetes Report.

Understanding Medication Data Across CRISP Tools

Maia Gottlieb – CRISP: Non-controlled medication data is now in InContext — this session shows you where to find it, how it differs from PDMP and reported meds, and what's possible when all three are used together.

Bulk Referrals: Improving Care Coordination

Michelle Nnorom – CRISP; Colleen Ennett, PhD – UMMS; Taylor Pitts – Director, FASST, Meals on Wheels: See how CRISP's bulk referral capability is powering the FASST program – with real outcome data – and learn how your organization can get involved.

Patty Brown Innovation Award & CEO's Closing Thoughts

Craig Behm – President & CEO, CRISP Shared Services: We'll close the Summit by honoring this year's Patty Brown Innovation Award recipients before Craig Behm shares his vision for where CRISP is headed.
