

Introduction to Medications in CRISP

*An overview of the different places users can find medication information
in CRISP*

May 19, 2026

Maia Gottlieb

Behavioral Health Lead

Medication Information Available in CRISP

1. PDMP
2. Dispensed Medications
3. Reported Medications
4. Medications from Claims

Why are these medications located in different places?

- Different access permissions (PDMP vs. others)
- Different sources of data
- Different formats

PDMP – Prescription Drug Monitoring Program

Data Source: Controlled Drug Dispensers

- The PDMP displays controlled substances, or medications with a DEA schedule II-V
- Certain fields are required to be reported
- This is available in the CRISP portal, but access is **determined separately from clinical access.**
- Users must have the required licensure or permissions, and register for the PDMP

Query Additional States

Please be advised that out-of-state prescriptions are matched on last name, first name, and date of birth ONLY, which could result in improper matching in some cases. CRISP encourages providers to use discretion when interpreting interstate data.

The Medications table has queried for dispensed medications from the following states:

MD

If you would like to view medications from additional states, please select from the dropdown:

Select All

Regional States:

Delaware

District of Columbia

Pennsylvania

Virginia

Dispensed Medications

Data Source: Non-Controlled Drug Dispensers

- As of September 1, 2025, dispensers (with some exceptions) are required to report **non-controlled** medication data to CRISP
- Certain fields are **required to be reported**
- This data is available in InContext, and unlike the PDMP, is subject to the same access requirements as any other clinical data.

DEFINITIONS

Reported Medications

Data Source: Participating Organizations

- Reported Medications are parsed from information sent to CRISP from participating organizations
- These may be hospitals, ambulatory sites, etc .
- This includes data that is reported to the participating organization, but may or may not have all of the information (ie, dispense date, dose) available

11

Medications from Claims

Data Source: Claims Data

- Medications from Claims are included in the InContext upon receipt
- These are often provided a few months after the medication is prescribed
- We currently receive Medicaid and Casemix (hospital) claims data

Medications from Claims
