

# CLINICAL REPORTING

Curated, dynamic reports and dashboards built on real-time clinical data.

## WHAT IS THE CLINICAL REPORTING DASHBOARD?

Clinical Reporting is a CRISP HIE Portal application that delivers **curated, dynamic reports and dashboards built on real-time clinical data.**

## AVAILABLE REPORTS

- Panel Demographics Report
- Hospital Revisit Report
- MDH IMHS Perinatal Referral
- IMHS Perinatal Facility Referral

## NEED ACCESS TO CLINICAL REPORTING?

REACH OUT TO YOUR ORGANIZATION'S HIE ADMIN AND REPORTS ROLE MANAGER POC

### INTERACTIVE POWERBI DASHBOARDS

Explore population data through dynamic, on-demand visualizations built on near real-time HIE clinical data, with daily refreshes and a two-year historical lookback.

### MULTI-SOURCE CLINICAL DATA

Reports draw from ADT feeds, lab results, CCD elements, SDOH assessments, and participant-shared patient panels, governed by HIE use cases.

### FLEXIBLE FILTERING AND DRILL-DOWN

Apply multiple filters simultaneously across demographics, time periods, and clinical categories to analyze specific subgroups within your population.

### ROLE-BASED ACCESS CONTROL

Organization POCs manage report access through Reports Role Manager, enabling precise control over which reports and dashboards users can view.
