

Submitter and Receiver ID Guidance for Electronic Health Care Transactions

Submission to CRISP

As part of the standard onboarding process, once we receive the onboarding form, we'll share the Submitter IDs with you for your organization. We have assigned a unique CRISP Trading Partner ID (Data Submitter Code) to your organization. All submissions sent to CRISP must use this assigned Submitter ID alongside CRISP's standard static Hub Receiver ID.

1. File Naming Convention (Mandatory for All Uploads): As a reminder, as stated in the Data Submission Guidance, every compressed file pushed to SFTP /Inbound must use your assigned Trading Partner ID as the [SENDERID] prefix:
[SENDERID]_[SUBMISSIONDATE]_[FILETYPE]_[SEQUENCE]_[VERSION].[EXTENSION]
 1. [SENDERID]: Your assigned CRISP Trading Partner ID (e.g., "MDEHN001")
 2. [SUBMISSIONDATE]: File creation / extraction date in YYYYMMDD format
 3. [FILETYPE]: 837P (Professional) or 837I (Institutional)
 4. [SEQUENCE]: 3-digit part sequence number (001, 002, 003...).
 5. [VERSION]: 2-digit version number (01 for initial submission; 02, 03 for corrected resubmissions)
 6. [EXTENSION]: .zip, .gz, .tar.gz, or .tgz
 7. Examples:
 1. Initial Submission: MDEHN001_20260901_837P_001_01.txt.gz
 2. Corrected Resubmission: MDEHN001_20260901_837P_001_02.txt.gz
2. Standard X12 837 (837P & 837I) Re-enveloping Instructions: When re-enveloping native ANSI X12 files for CRISP, configure your translation engine using Qualifier ZZ (Mutually Defined), following standard WEDI/HIPAA implementation guidelines for message and envelope construction:
 1. ISA05: ZZ
 2. ISA06 (Interchange Sender ID): Your assigned CRISP Trading Partner ID (padded to 15 characters with trailing spaces) (e.g., "MDEHN001 ")
 3. ISA07: ZZ
 4. ISA08 (Interchange Receiver ID): **CRISPMD** (CRISP Hub ID, padded to 15 characters with trailing spaces) (e.g., "CRISPMD ")
 5. GS02 (Application Sender Code): Your assigned CRISP Trading Partner ID
 6. GS03 (Application Receiver Code): **CRISPMD**

7. Loop 1000A NM109 (Submitter Identifier): Your assigned CRISP Trading Partner ID (NM108 = 46 or ZZ)
8. **IMPORTANT:** Do NOT overwrite Loop 2010BB / 2010BC NM109 (Destination Payer ID). This element must remain the original target payer identifier intended to adjudicate the claim.
3. CRISP Flat File Submissions (837P & 837I): If submitting via the CRISP 837 Pipe-Delimited Flat File layout, populate your assigned Trading Partner ID and the static Receiver ID in the following fields:
 1. Header Record (HD):
 1. CDLHD002 (Data Submitter Code): Your assigned CRISP Trading Partner ID (e.g., "MDEHN001")
 2. Detail Records (CDL / CDLMC):
 1. CDLMC001 (Data Submitter Code): Your assigned CRISP Trading Partner ID on every service line row
 3. Trailer Record (TR):
 1. CDLTR002 (Data Submitter Code): Your assigned CRISP Trading Partner ID (must match CDLHD002 exactly)
